

Dear FCC,
PLEASE THINK CAREFULLY! DO NOT allow what happened to the airwaves happen to newspapers, as well. We must have more than one or two versions of the news, especially in the same geo. area. Otherwise, we might as well just be spoonfeed what info. has been decided to be "appropriate for us to hear. Sort of like how almost all images of NY City were restricted by the media. You remember, video games being redone, certain songs removed from playlists, all in order to keep the fragile American people from being disturbed by such things, as we should be.

Although I do not currently listen to corp.news because I find it insulting to the intelligence of the American people, (not to mention, dishonest) I do not wish to see further damage done.

Please do not allow/encourage more profits at the risk of the American People receiving only slanted "news coverage". Sincerely, Vicki Carmack
